Joshua Cullen

NSF Postdoctoral Research Fellow
Dept. of Earth, Ocean, and Atmospheric Sciences
Florida State University
507 Oceanography Building • Tallahassee, FL 32306
E-mail: joshcullen10@gmail.com

Education

Texas A&M University, College Station, TX — August 2019
Ph.D. Wildlife & Fisheries Sciences

Clemson University, Clemson, SC — May 2013
B.S. Biological Sciences

Research Interests

I am broadly interested in the ecological roles of vertebrate organisms and their movement patterns to assess how sympatric species partition niche space and interact with their environment. By using an integrative approach to understand how organisms function within the scope of their environment, associations of physical performance can be used to assess ecological roles and resource use. I have developed an R package (`bayesmove`) for the estimation of latent behavioral states from animal movement data using Bayesian models, with ongoing method development for new models to estimate landscape resistance/permeability and habitat selection. I have begun to extend the results of these analyses using R Shiny applications as potential decision-support tools, as well as for basic data exploration. These analyses can then be used to inform conservation and management of species from an integrative perspective. I am particularly interested in using quantitative methods (e.g., non-parametric Bayesian models, state-space models, mixed effects models, multivariate ordinations and clustering) to address complex ecological problems.

Publications

Cullen JA, Attias N, Desbiez ALJ, Valle D. (in prep). Uncovering behaviors of cryptic species: latent behavioral states, activity budgets, and habitat associations of giant armadillos (*Priodontes maximus*) in the Brazilian Pantanal.

Research Experience

Postdoctoral Research: 2019 – 2021
School of Forest, Fisheries, and Geomatics Sciences, University of Florida
(Research Advisors: Dr. Denis Valle and Dr. Robert Fletcher)

- Development of novel Bayesian methods to discern latent behavioral states from animal biotelemetry data
- Estimated behavioral states of endangered snail kites (*Rostrhamus sociabilis plumbeus*) across Florida and conducted population viability analysis with emphasis on climate change impacts in collaboration with USFWS
- Estimated behavioral states, activity budget, and state-habitat relationships in giant armadillos (*Priodontes maximus*) in the Brazilian Pantanal
- Development of a new method to characterize landscape permeability from biotelemetry data that incorporates habitat selection and time spent moving across the landscape
- Remote sensing data downloaded and extracted to calculate different indices (NDVI, EVI, NDWI, etc) using a variety of remote sensing imagery (Landsat 8, Sentinel-2)

Dissertation Research: 2013 – 2019
Department of Wildlife & Fisheries Sciences, Texas A&M University
(Research Advisor: Dr. Christopher Marshall)

- Integrative study of sharks and their roles in coastal ecosystems over ontogeny by measuring bite force, trophic ecology, and conducting a risk assessment of major organic pollutants (PAHs and PCBs)
- The allometric scaling of bite force was measured over ontogeny and related to ontogenetic dietary shifts (via $\delta^{13}C$ and $\delta^{15}N$ stable isotopes)
- 45 organic pollutants (PAHs/PCBs) were quantified in shark liver and muscle tissue and these burdens were related to feeding ecology (via stable isotopes)
- Shark tooth shape was characterized using elliptic Fourier analysis to evaluate heterodonty over ontogeny and among tooth positions of a given species

Qatar Field and Ecological Modeling Experience: 2014 – 2018
Department of Wildlife & Fisheries Sciences, Texas A&M University
(Research Advisor: Dr. Christopher Marshall)

- The movement ecology of hawksbill (*Eretmochelys imbricata*) and green sea turtles (*Chelonia mydas*) was studied in relation to biophysical variables in the Arabian Gulf using Bayesian state-space models and species distribution models (GAMMs)
- Remote sensing data were downloaded and extracted for each of the static and dynamic environmental variables included in the species distribution models
- Seasonal utilization distributions were calculated and biophysical variables were used to determine drivers of latent states (i.e., transit and area restricted search)

Undergraduate Research: 2010 – 2013
Department of Biological Sciences, Clemson University
(Research Advisor: Dr. Richard Blob)

- Kinematic analysis of a Hawaiian climbing goby (*Sicyopterus stimpsoni*) comparing cranial movements during feeding and climbing behaviors
- Analyzed kinematic profiles of multiple variables to determine potential evolutionary relationship between superficially similar behaviors
- This research resulted in an oral presentation at a national conference and a publication

Teaching Experience

Teaching Assistant, Natural History of Vertebrates (MARB 315) 2014 – 2019
Texas A&M University at Galveston, Galveston, TX

Undergraduate Teaching Assistant, Vertebrate Biology (BioSci 307) 2012
Clemson University, Clemson, SC

Technical Skills

Coding languages: R, JAGS, Stan, Nimble
Software: QGIS, ArcGIS, Google Earth Engine
Other: Git/GitHub, RShiny, Rmarkdown, LaTeX, Adobe Illustrator/Photoshop

Software Developed

bayesmove (R package, http://joshcullen.github.io/bayesmove/)

Fellowships and Awards

NSF Ocean Sciences Postdoctoral Research Fellowship (Florida State University) 2021
University of Florida Informatics Institute Postdoctoral Fellowship 2019
Texas A&M University at Galveston Graduate Boost Fellowship 2017
Texas A&M University Doctoral Merit Fellowship 2013
College of Agriculture and Life Sciences Excellence Fellowship (Texas A&M University) 2013
College of Agriculture, Forestry and Life Sciences Senior Award (Clemson University) 2013
NSF Research Experience for Undergraduates (Clemson University) 2012
NSF Research Experience for Undergraduates (Rutgers University) 2011

Grants & Funding

NSF Ocean Sciences Postdoctoral Research Fellowship ($273,561) 2021
US Fish & Wildlife Service Snail Kite Population Viability Analysis ($12,551) 2021
Texas A&M University at Galveston – Department of Marine Biology Mini-Grants ($2500) 2014 – 2018
Erma Lee and Luke Mooney Graduate Student Travel Grant ($1000) 2015, 2017
Texas Sea Grant, Grants-In-Aid of Graduate Research ($1000) 2014

Invited Presentations

EFI Webinar Series: Visualization of Data in Space and Time: An Interactive Framework 2021

Service

Co-organized "Taking your R Shiny apps to the next level" webinar – Ecological Forecasting Initiative	2021
Co-organized "Expanding the scope of connectivity" workshop – IALE Conference	2021
Secretary, ESA Statistical Ecology Section	2020 – present
Sea Turtle Nesting Responder (Upper Texas Coast)	2016 – 2019

Professional Societies

Ecological Society of America
Society for Integrative and Comparative Biology
American Fisheries Society

Conference Presentations

Cullen, JA, Attias N, Desbiez ALJ, Valle D. August 2021. Uncovering behaviors of cryptic species: latent behavioral states, activity budgets, and habitat associations of giant armadillos (*Priodontes maximus*) in the Brazilian Pantanal. Ecological Society of America Meeting, virtual.
